

I am a 6th grader. I was having problems in school. At home my Mom was doing her best, but it's just her and not long ago we found out she had Cancer. At school my teacher sent me to a Communities in Schools case worker. He talked with me and helped me get the school supplies I needed and help with my homework. At the end of the following 6 week period, I got Teen of the Month and was passing all of my classes. I am still doing really good in school!
